One good thing about donation, once you do it, you get addicted to it because it brings great joy and happiness to you.

Ghurki Trust Teaching Hospital Achieves Punjab Health Care Commission's License

Punjab Health Care Commission has awarded its license to Ghurki Trust Teaching Hospital. This is another step towards the journey to achieve excellence. Ghurki Hospital has always strived for the best and this achievement speaks for the efforts it has put in. Sky is the limit and the entire management of GTTH is fully dedicated to maintain the highest levels. This License is now a true testament to continue our mission for serving the best way to ailing humanity in terms of patients care and services. Ghurki Trust Teaching Hospital is a purpose built charitable hospital. Its foundation stone was laid down by Abdul Sattar Edhi (Late) and since its inception hospital has achieved

remarkable milestones in bringing the excellent faculty in all specialties and particularly building the 1st Spine Centre of

Pakistan under the supervision of Prof. Dr. Amer Aziz, Chairman Ghurki Trust Teaching Hospital started its journey from an eye camp and now it has become a complete modern health care facility with 600 beds. It provides basic and latest health facilities to the non-affording patients for free of cost and on very subsidized rates to the affording patients. In addition to this license Ghurki Hospital is recognized by Pakistan Medical & Dental Council (PMDC) and affiliated with University of Health Sciences (UHS). It is certified by ISO 9001-2015 other affiliations include PCP (Pakistan Centre for Philanthropy), CPSP, AOSPINE Switzerland, Charity Commission UK and USA.

Prof. Dr. Amer Aziz AO Trustee Award

Chairman Ghurki Trust Teaching Hospital Prof. Dr. Amer Aziz has been awarded AO Trustee Award 2014-2019 by the chairman AO Foundation Prof. Robert McGuire. This is indeed a spectacular achievement. Prof. Dr. Amer Aziz is a renowned Orthopaedic & Spine surgeon also heading the Orthopaedic & Spine center of GTTH Lahore. He was elected as Councilor to the college of Physician and Surgeons of Pakistan, Securing the highest number of votes in the country twice in 2006 &

2011. AO Spine International Switzerland, the largest Spine Organization in the world, has

awarded a full fledge chapter to Pakistan and Prof. Dr. Amer Aziz as its founding chairman. Prof. Dr. Amer Aziz is the member of the board of governors of UHS (University of Health Sciences). He is also the member senate KEMU. AO Spine has declared Prof. Dr. Amer Aziz as the "Best Educationist" for the year 2017. In addition to many other achievements he was also awarded as best teacher for the year of 2010 and AO best educator of Middle East for 2012 and 2014.

We thank to our Member Board of Trustees Mr. Shahid Afzal Khokhar (Sialkot) for their generous support. Another Fundraising Gala Dinner was held in Manchester dated 3rd May 2019.

1st International Foot and Ankle Surgery Week

1st International Foot and Ankle Surgery Week was a successful spectacular event arranged and hosted by Ghurki Trust Teaching Hospital's Orthopaedic and Spine Centre under the supervision of Prof. Dr. Amer Aziz. More than 50 international and national participants were present in the workshop. Dr. Mark Myerson (USA), Dr. Raheel Shareef (UK), Dr. Haroon Maan (UK), Chief of Orthopaedic and Spine Center Prof. Dr. Amer Aziz, Prof. Dr. Naeem, Prof. Dr. Shehzad, Dr. Abdullah Shah, Prof. Rizwan Akram, Prof. Dr. Ijaz Ahmed, Prof.

Ateeq uz Zaman and Dr. Khurram Ijaz Medical Director GTTH also attended the conference. It was five days conference including different lectures delivered by Dr. Mark Myerson (USA), checkup of the patients and live surgeries were performed of 30 patients having foot and ankle deformities. Prof. Dr. Amer Aziz stressed the need for the conducting more such research-oriented activities. Prof. Dr. Amir Aziz also reiterated as they can help us in our collective mission of attaining comprehensive healthcare services.

Ultrasound Guided Regional Nerve Blocks Workshop

Ultrasound Guided Regional Nerve Blocks Workshop was held in GTTH by Anesthesia Department in collaboration with APPNA (Association of Physicians of Pakistani Descent of North America). Course was headed by Dr. Irfan Suleman MD, Director Pediatric Regional Anesthesia, Johns Hopkins University Hospital, Baltimore, USA. Faculty Included Prof. Leena Aziz (Ghurki Trust

Teaching Hospital Lahore), Dr. Almas Iqbal (Shalimar Hospital Lahore), Dr. Ather Siddiqui (Shaukat Khanum Hospital Lahore), Dr. Usman Bashir (Kaul Associates Lahore), Dr. Liaqat Ali (Jinnah Hospital Lahore), Dr. Naila Asad (Services Hospital Lahore). Course Coordinators were Dr. Abaid Ur Rehman (A.P), Dr. Nabeel, Dr. Kashif, and Dr. Adnan. It was a full Day Workshop on Ultrasound Guided Nerve Blocks with live

sessions. More than 75 Participants from all over Pakistan participated. Professor of Anesthesia Department (Spine Center) Dr. Leena Aziz said the purpose of this workshop was to improve the standard of patient care and learn new skills, as it is relatively a new field in Pakistan. Participants also expressed their gratitude that for arranging this unprecedented event.

A Woman Blessed with Quadruplets (Four Babies)

Wife of Mr. Muhammad Qaiser, resident of Jallo Morr Lahore was blessed with four newborns, 2 boys and 2 girls. Shumaila's husband brought her in Ghurki Hospital in critical condition. Despite the fact that Shumaila was a high risk pregnancy case, Dr. Nabila Shami head of Gynaecology and Obstetrics department, admitted her to the hospital. Dr. Nabila

Shami stated that it was a unique and high risk case but we determined that it was possible so her case was taken as a challenge and then with the grace of Allah babies and their mother's lives were saved. Mr. Muhammad Qaiser was so relieved and thankful for becoming a father to four healthy babies as his wife and babies received the best treatment

at GTTH. This joyous moment was celebrated at Ghurki Hospital and the management provided the newborns with gifts. The parents were happy for being blessed and distributed sweets in the hospital. They were thankful to Allah for this blessing, and they also appreciated Ghurki Hospital for all their support and care.

Patient Story

29 years old Mr. Muhammad sadique is a resident of Taxila (Rawalpindi). One year ago, in a road accident, his hip joint was dislocated. He visited all hospitals in Taxila and nearby towns but none of the hospital was able to cure and treat him. Day by day the condition was getting complicated and he even stop walking. By profession, Muhammad Sadique is a farmer and belongs to a humble family.

He is the sole bread earner of his family. Mr. Muhammad Siddique's family spent all their fortunes but all in vain.

Then he came to know about the Ghurki Hospital where he was not only admitted but also operated very next day.

Mr. M. Sadique and his family were so happy that after one year long struggle they finally found a hospital where he was cured without the expense of a single rupee. The quick turnaround time and best post-operative care was a dream came true for them.

Pharmaceutical Services

The pharmacy Department is a fully functional unit of Ghurki Trust Teaching Hospital. The aim is dispensing, counseling and provision of clinical and

technical services to both outdoor and indoor patients by the use of Hospital Management Information System (HMIS). Pharmacy and Therapeutic Committee (P and TC) of GTTH is active and fully functional which has approved a generic based hospital formulary to ensure safe, cost effective and quality use of drugs. The department of Pharmaceutical

Services has sections such as: Procurement unit / Main Store, Outpatient pharmacy (OPD), Inpatient pharmacy (IPD) and clinical pharmacy. Clinical services are provided by respective clinical pharmacists at ward level. Drug related information is provided by pharmacists to health care professionals and patients as well. Department of pharmaceutical services also provides free of cost medicines to non-affording patients. It is also involved in teaching and training of the pharmacy graduates.

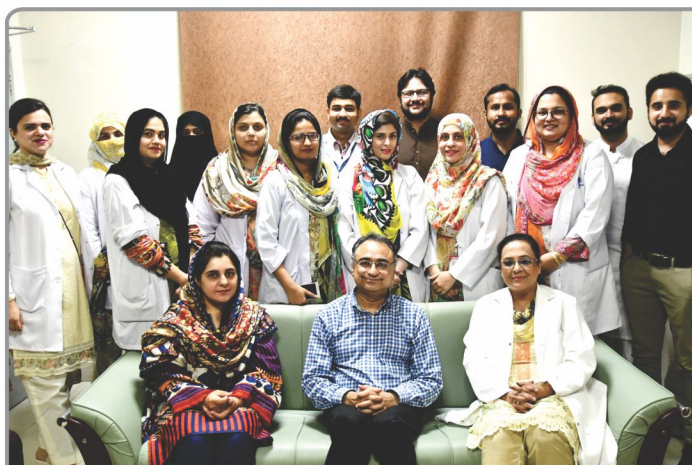

Ghurki Hospital Radiology Centre

Radiology department GTTH is committed to provide the highest quality medical care at minimum cost. Renowned physician and staff members under the supervision of Professor Dr. Khalid Farooq & Professor Dr. Javaid Asghar focus on blending the latest in radiological technology with specialized expertise to diagnose

and treat patients with respect and genuine compassion. GTTH perform more than

77,000 exams per year across all types of imaging technology that includes MRI, CT scan, USG, Doppler studies, X-rays, TRUS & USG guided procedures. We are dedicated to improving the public health, providing an outstanding education for our students, residents and fellows, and advancing the practice of medicine.

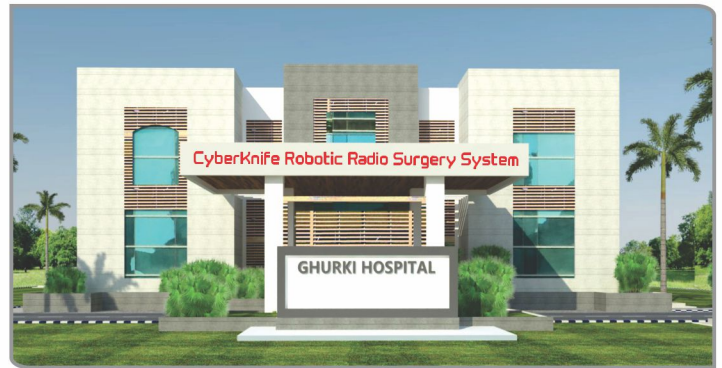

Cyberknife (Robotic Radio Surgery System)

A New Hope for Cancer Patients

In Pakistan every year around 300,000 new cases of cancer patients are diagnosed. The health facilities available in Pakistan to treat cancer patients are limited, therefore Ghurki Trust Teaching Hospital has started the construction of Cyberknife

(Robotic Radio Surgery System) the 2nd in Pakistan. Alhamdulillah, now building for this project is in its final stage. The installation of Cyberknife in Ghurki Hospital, is about to bring a revolution as it will provide free of cost international

standard treatment to cancer and non-cancer patients. This facility will cost around 400 million (40 crores) and it will be entirely dedicated to the poor and deserving cancer patients from all over Pakistan irrespective of religion and ethnicity.

Patient's Attendants Stay Area (Musafir Khana)

In Pakistan it is customary that not only the patient is admitted in the hospital but most of the family also accompanies the patient. Therefore hospitals always appear over occupied. The

attendants have to go through a very tough time because the facilities are almost nonexistent. GTTH has come up with a unique solution to facilitate the attendants. "Musafir Khana" an

accommodation facility for patient's families who travel from far flung areas. This facility will be able to accommodate around 400 people. Hopefully this facility will be available by the end of 2019, Insha Allah.

CHARITY WORK

Ghurki Trust Teaching Hospital is providing "State of the art" free of cost health facilities to non-affording poor patients without any discrimination. The same services are available for affording patients on very subsidized charges as compared to other hospitals.
