Cyberknife Robotic Radio Surgery System “A New Hope for Cancer Patients”

The CyberKnife at Ghurki Trust Teaching Hospital is a state-of-the-art, non-invasive robotic radiosurgery system designed for treating tumors with pinpoint accuracy. It represents a significant advancement in cancer treatment, offering a painless alternative to traditional surgery. The system uses advanced imaging to deliver high doses of radiation directly to the tumor, minimizing damage to surrounding healthy tissues. Suitable for treating various cancers, including brain, spine, lung, liver, and prostate, CyberKnife provides patients with a highly effective option with fewer side effects and shorter recovery times.

This cutting-edge technology underscores Ghurki Trust Teaching Hospital's commitment to excellence in patient care and innovation. The success rate of CyberKnife treatments at Ghurki Hospital is high, with many patients experiencing significant tumor reduction and improved outcomes. The procedure's precision reduces side effects and shortens recovery times, enhancing the overall patient experience and quality of life. Hundreds of patients have been treated so far free of cost.

Scoliosis Workshop at Spine Center

The Ghurki Trust Teaching Hospital in Lahore hosted a three-day workshop on scoliosis organized by AOSpine. This event provided a crucial platform for healthcare professionals to explore scoliosis, characterized by abnormal spine curvature. Participants engaged in hands-on learning, interactive discussions, and expert-led presentations on the latest advancements in diagnosis, treatment, surgical techniques, and post-operative care. The workshop enhanced understanding of scoliosis management and refined clinical skills, while also fostering networking within the spine surgery community. By promoting education and collaboration, the workshop empowered professionals to improve care quality and patient outcomes for individuals with scoliosis.

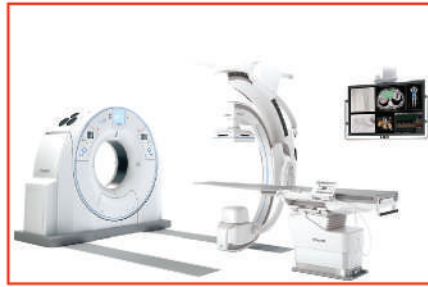

A visit of Renowned Interventional Radiologist Dr. Naveed Ahmed

Dr. Naveed Ahmed, a renowned interventional radiologist from Jinnah Postgraduate Medical Center (JPMC) Karachi, visited Ghurki Trust Teaching Hospital's Radiology and CyberKnife departments. He shared his expertise on fiducial marker insertion for prostate, liver, and lung cancer patients, emphasizing precise placement and advanced imaging techniques. His insightful presentation and hands-on training enhanced our skills, improving patient care and outcomes.

Pain Management Workshop

The Department of Anesthesia and Pain Medicine hosted an Interventional Pain Management Cadaveric Workshop on 15th & 16th May 2024, at the Orthopaedic and Spine Centre, Ghurki Trust Teaching Hospital, led by Prof. Dr. Leena Aziz (Head of Anesthesia Department). The workshop covered essential pain management techniques, including assessments, examinations, ultrasound, fluoroscopy-guided interventions, physiotherapy, and rehabilitation. Prof. Dr. Leena Aziz (HOD) aims to establish a dedicated pain medicine institute at the hospital. Over 50 participants from across Pakistan attended, receiving high praise from Prof. Dr. Amer Aziz (Chairman), Muhammad Naeem (Chief Operating Officer), and Dr. Khurram Ijaz (Medical Director). Delegates found the workshop highly educational and beneficial.

World Asthma Day 2024

Asthma in children, impacting growth, physical activity, and schooling, was highlighted on World Asthma Day, 7th May 2024, with the theme "Asthma Education Empowers." The Department of Pediatrics at Ghurki Trust Teaching Hospital held an event led by Prof. Dr. Rizwan Waseem. The workshop featured "Global Initiative for Asthma (GINA)" guideline presentations, hands-on inhaler and nebulizer training, and pulmonary function tests. Maj. Gen. (R) Naeem Naqi praised the well-organized event and the department's commitment to ongoing education.

Angiography

Ghurki Hospital has initiated angiography services to address the urgent needs of heart patients. Angiography is a vital diagnostic tool for detecting blockages and abnormalities in blood vessels, enabling precise and effective treatment. This new service at Ghurki Hospital will significantly enhance the care for cardiovascular patients, providing timely and accurate diagnoses that are critical for successful interventions and improved patient outcomes. The introduction of angiography is a major step forward in the hospital's commitment to comprehensive heart care.

MRI 1.5 Tesla

Alhamdulillah, with the help of Allah Almighty and the generous contributions from our donors, the 1.5 Tesla MRI machine at Ghurki Hospital is now operational and ready to serve patients. This advanced imaging technology will significantly enhance our diagnostic capabilities and improve patient care. We are deeply grateful for the support that has made this possible, ensuring that our community has access to high-quality medical services. Thank you to everyone who contributed to this important milestone.

Upcoming Projects

You can sponsor a room, a lecture room, a library or even an entire floor in the memory of your loved ones.

You can sponsor an operation theatre, a machine, a ward, or even an entire floor in the memory of your loved ones.
